

**Power**

**SALICE**

## Power

Power is the kit used to motorise Salice sliding systems.

With Power, the door opening and closing movements are controlled by quiet motors fixed to the load-bearing profile.

An initial manual movement of the door is sufficient to activate the motor in order to complete the movement.

Optionally there is a remote control and buttons to be fixed to the cabinet sides for the Push to Open effect.

The system is also compatible with the home automation systems.

## Technical Information

The Power motorisation system can be used with Salice's sliding systems for both overlapping and coplanar doors.  
Power can be used on the following systems:

- Slider M35
- Slider M50
- Slider M50 FLEX
- Slider M35 TOP
- Slider L70
- Glow+
- Slider S20 Base cabinet
- Slider S20 Wall cabinet

A single Power unit operates a sliding system with either a single door or 2 doors. When two Power units are connected in series, it is also possible to operate mechanisms with 3 and 4 doors.

The system can also be configured in the Reverso version (only for 2 doors) and in the Step version (only on request).

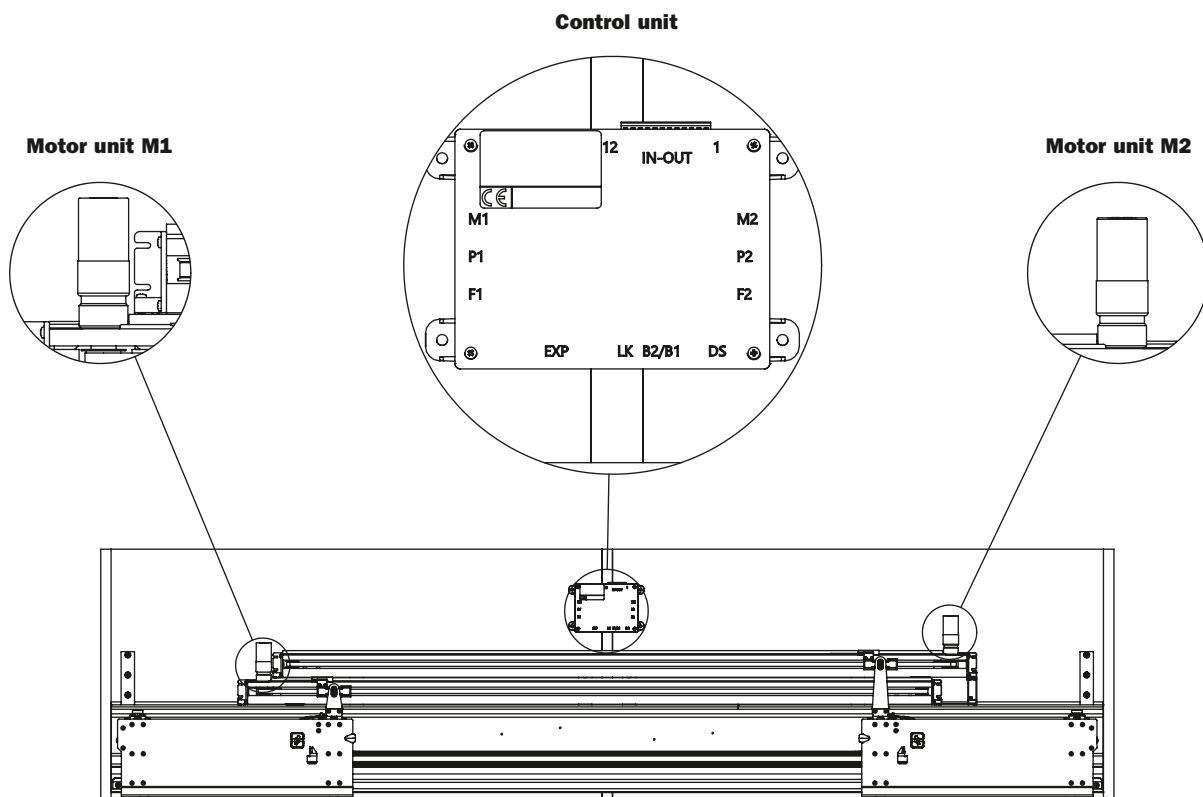

Power comprises a 24V motor for each individual door and a control unit that can manage a maximum of two doors.

The motors are connected to a transformer that converts the mains voltage (110v-220v) into low voltage 24V (for further details see the control unit manual).

The mechanical link between the motorisation unit and the sliding mechanism is established by support bracket kits specific to each mechanism.

The motorisation system can be fixed in two methods:

1. directly on the cabinet, hereinafter defined DIRECT FIXING;
2. pre-assembled on the sliding mechanism with special interface profiles suitable for installation in a wall recess, hereinafter defined PREMOUNTED ON MECHANISM

## Power kit • Slider S20 Base cabinet

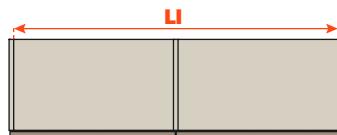

Configure the Power kit by selecting the part numbers at points 1, 2 and 3.

- 1** • According to the internal width of the cabinet (LI) select the motor unit.

### **Power kit premounted on mechanism • Glow+ 3 doors**

The pre-assembly through the interface profile makes the Power kit integral with the mechanism. This pre-assembly has been developed to facilitate the installation in a wall recess and all cases in which it is not possible to fix the motorisation profiles from above.

**The Power system can be pre-assembled only on Glow+ sliding system equipped with a reinforced upper profile.**

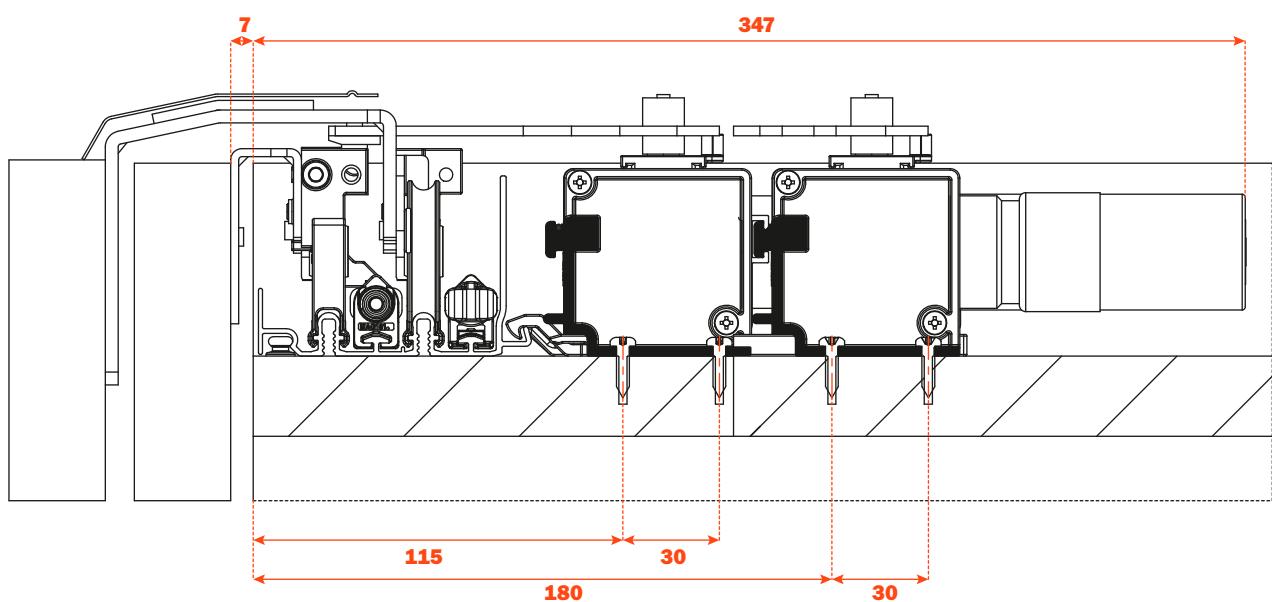

**Interface profile VE71KITF102A (see page 37)**

---

### **Power kit with direct fixing to the top of the cabinet • Glow+ 3 doors**

The fixing of the Power profiles directly to the top of the cabinet with woodscrews (not included) does not require the additional interface profile, but it requires space above the cabinet to fix the screws from above.

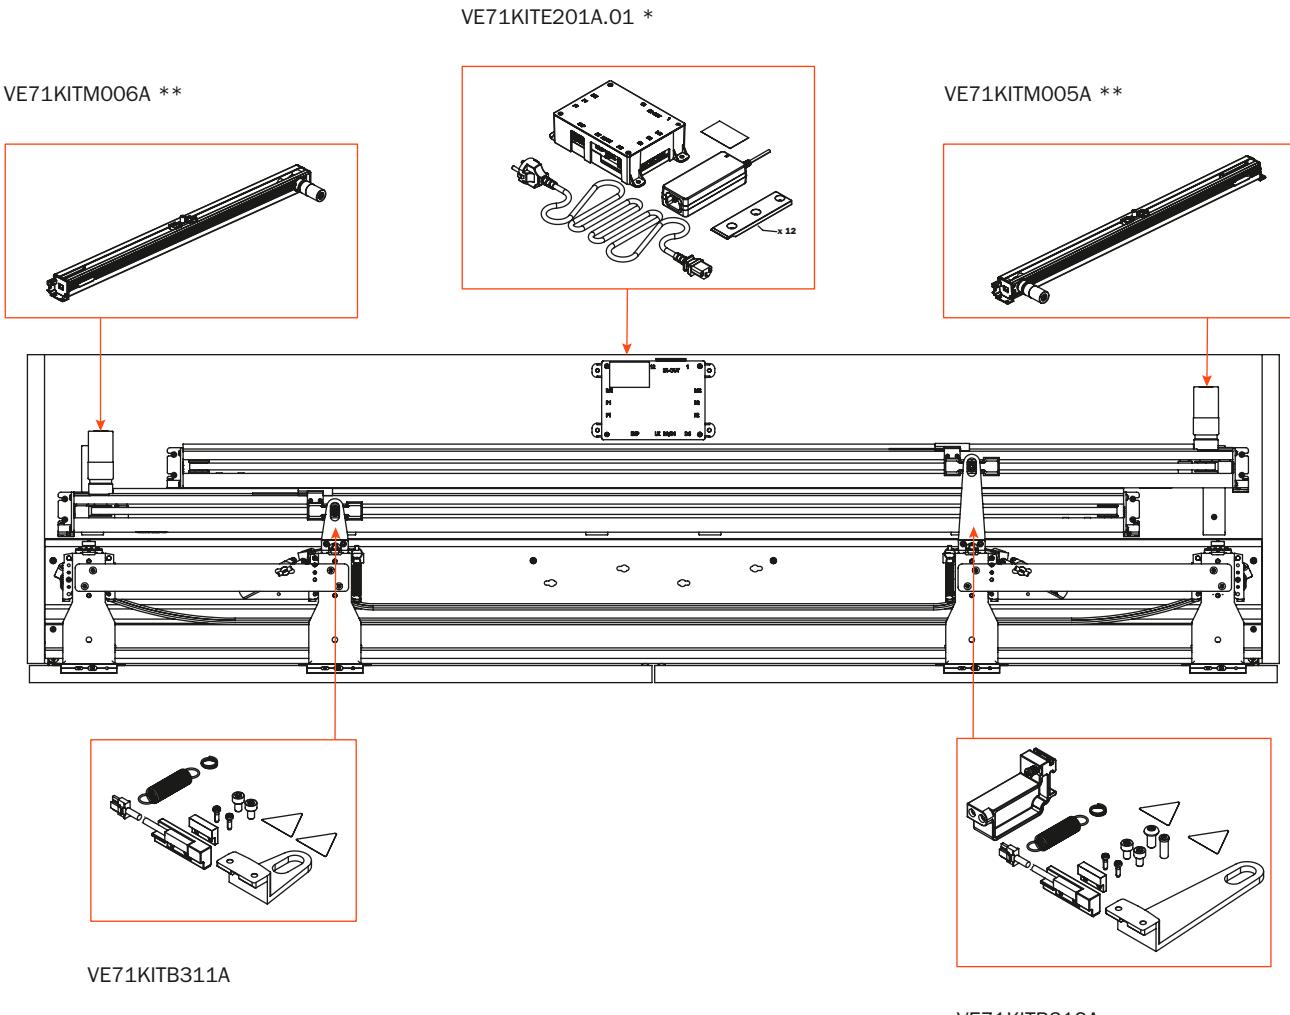

## Assembly examples

## Power kit compositions: Slider S20 Base cabinet

Motorisation example of a Slider S20 Base cabinet with two doors with Power kit fixed directly to the bottom panel of the cabinet with woodscrews.

For the Slider S20 Base cabinet, the M1 motor unit will activate the right door while the M2 motor unit will activate the left door.

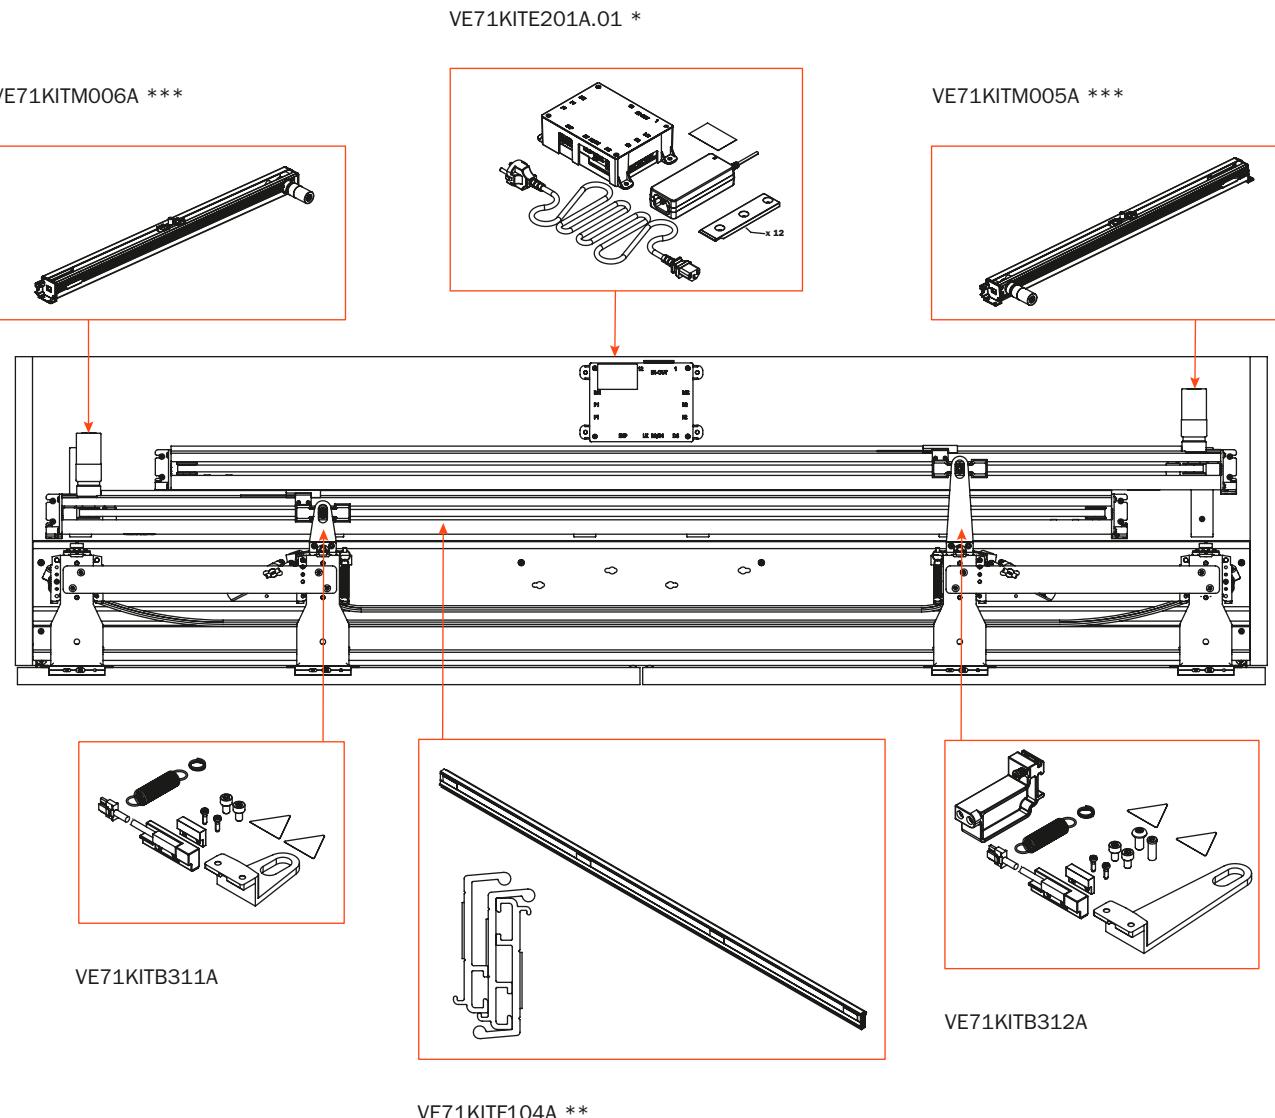

\* kit with Schuko plug

\*\* in the example we consider LI = 1800 mm. For different dimensions, please use the tables Kit M1 and Kit M2 at page 4.

## Power kit compositions: Slider S20 Wall cabinet

Motorisation example of a Slider S20 Wall cabinet with two doors with Power kit premounted on mechanism through the interface profiles VE71KITF104A.

\* kit with Schuko plug

\*\* the interface profiles kit is an option to be used for installation in a wall recess

\*\*\* in the example we consider LI = 1800 mm. For different dimensions, please use the tables Kit M1 and Kit M2 at page 8.

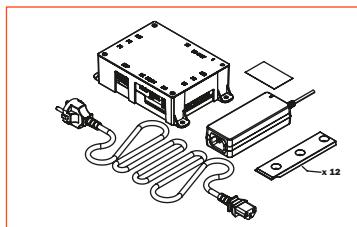

## Power kit compositions: Slider M50

Motorisation example of a Slider M50 with two doors with Power kit premounted on mechanism through the interface profiles VE71KITF103A.

VE71KITM005A \*\*\*

VE71KITA211A

VE71KITA212A

VE71KITF103A \*\*

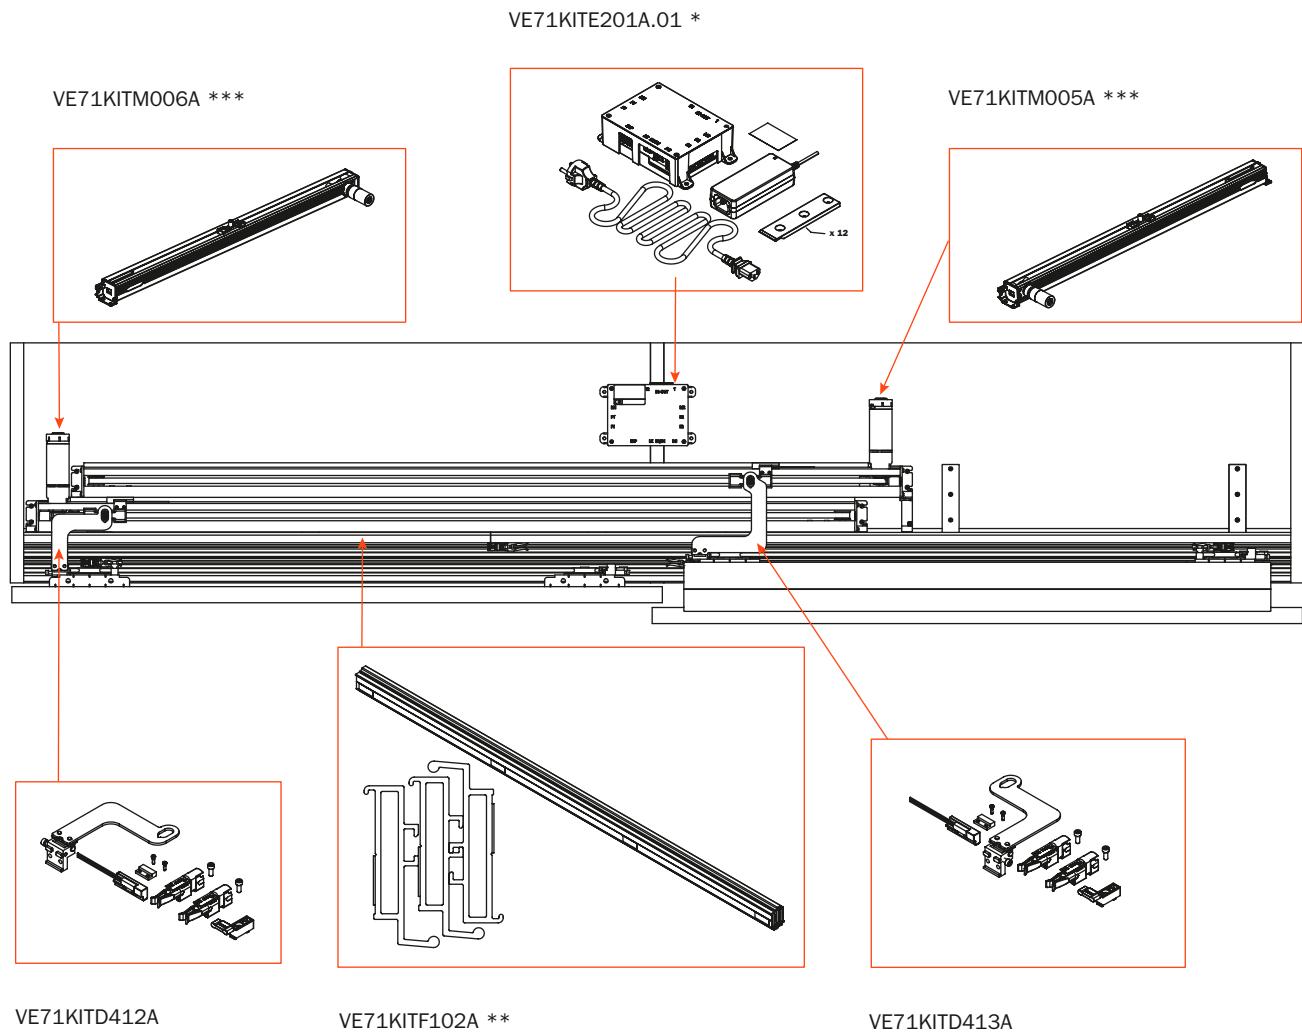

\* kit with Schuko plug

\*\* the interface profiles kit is an option to be used for installation in a wall recess

\*\*\* in the example we consider LI = 1800 mm. For different dimensions, please use the tables Kit M1 and Kit M2 at page 12.

## Power kit compositions: Glow+ 2 doors

Motorisation example of a Glow+ sliding system with two doors with Power kit premounted on mechanism through the interface profiles VE71KITF102A.

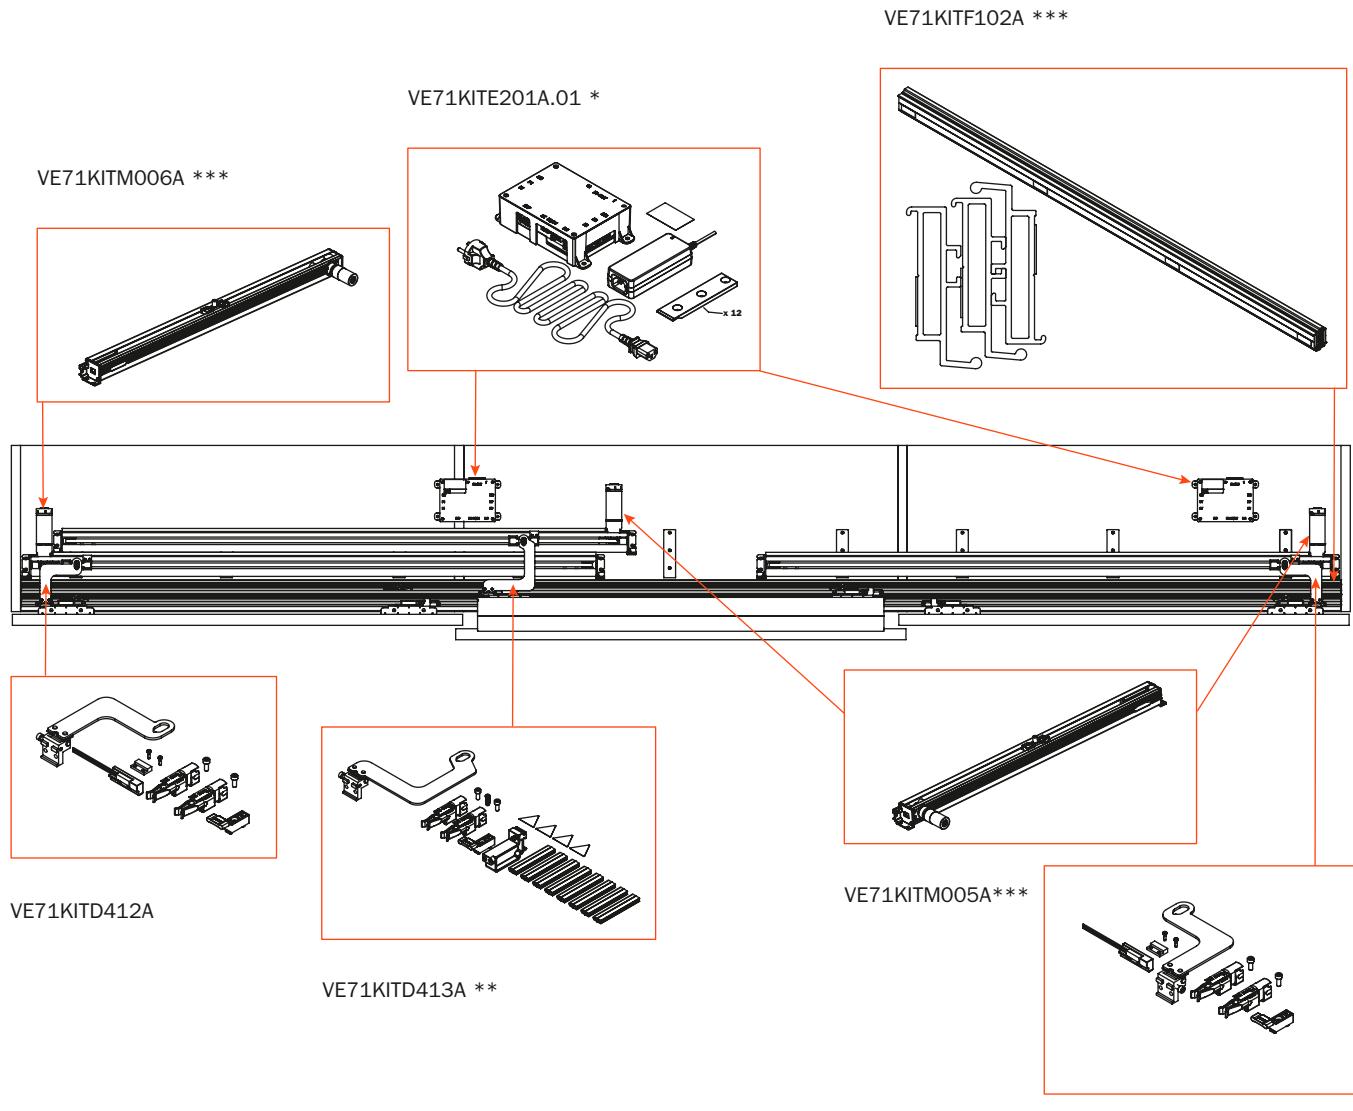

\* kit with Schuko plug

\*\* the interface profiles kit is an option to be used for installation in a wall recess

\*\*\* in the example we consider  $L_1 = 1600$  mm. For different dimensions, please use the tables Kit M1 and Kit M2 at page 24.

## Power kit compositions: Glow+ 3 doors

Motorisation example of a Glow+ sliding system with three doors with Power kit premounted on mechanism through the interface profiles VE71KITF102A.

\* kit with Schuko plug

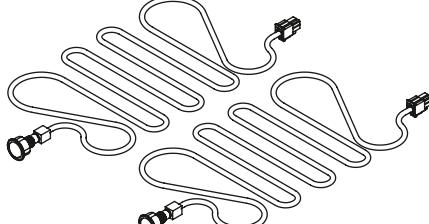

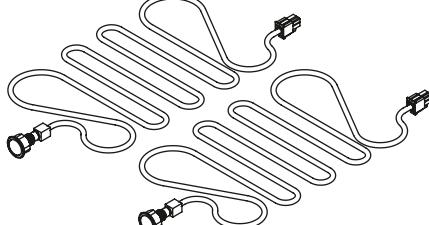

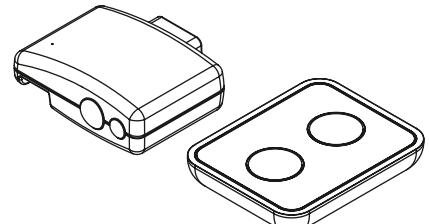

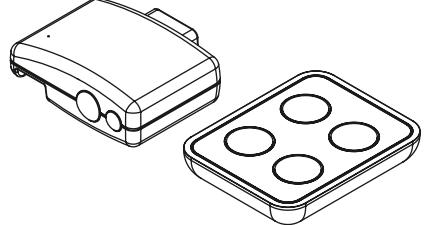

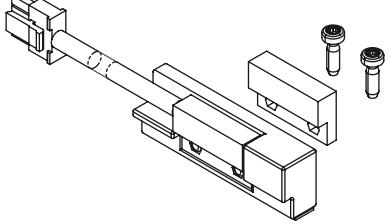

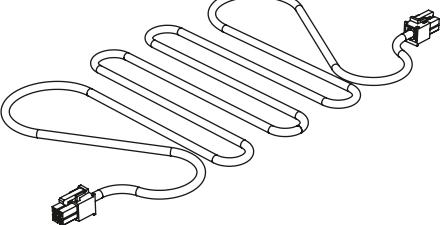

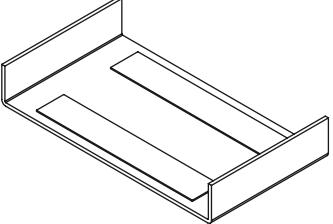

\*\* the interface profiles kit is an option to be used for installation in a wall recess

\*\*\* in the example we consider  $L_1 = 2600$  mm. For different dimensions, please use the tables Kit M1 and Kit M2 at page 24.

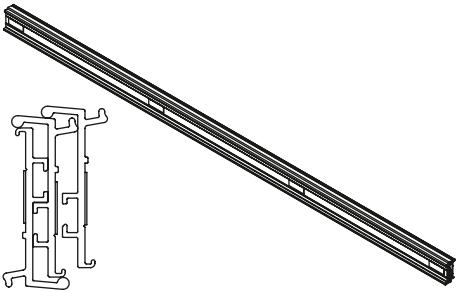

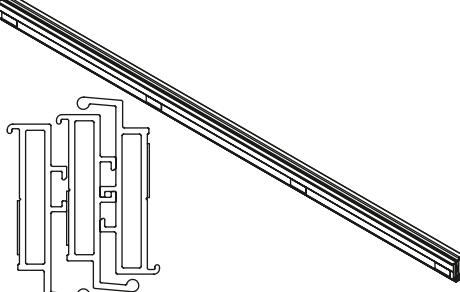

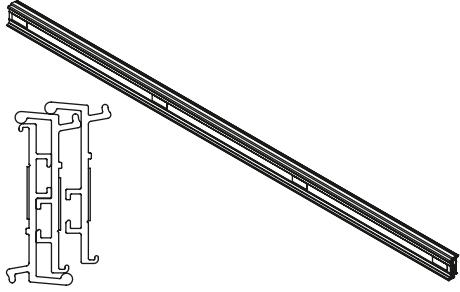

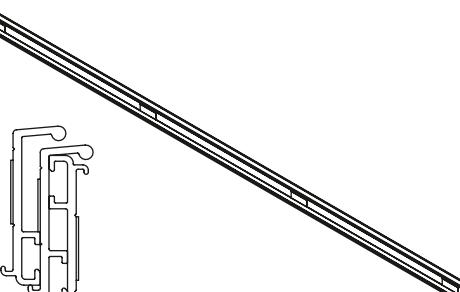

## Option

**Option**

	<b>Part number</b>	<b>Description</b>
	VE71KITE208A	<p><b>M50 • M50 Flex • L70 • Glow+</b>            Kit with green luminous buttons to be inserted into the external side with 3000 mm pre-wired cable and minifit final element.</p>
	VE71KITE209A	<p><b>S20 • M35</b>            Kit with green luminous buttons to be inserted into the external side with 3000 mm pre-wired cable and minifit final element.</p>
	VE71KITE230.0	Kit with remote control with 2 buttons and receiver.
	VE71KITE231.0	Kit with remote control with 4 buttons and receiver.
	VE71KITE210A	Kit with sensors and buffers.
	VE71KITE211A	<p>Kit with control units connection cable.            Used to synchronise two control units for mechanisms with 3 or 4 doors.</p>
	VE71KITE240A	<p><b>Glow+ 3 doors</b>            Kit with motor unit support</p>

Kit with interface profiles to premount the motorisation system to a mechanism.

	<b>Part number</b>	<b>Description</b>
	VE71KITF101A	Kit with interface profiles for Slider M35. 3 profiles (length 1.5 mt) with double-sided adhesive pad.
	VE71KITF102A	Kit with interface profiles for Glow+. 3 profiles (length 1.5 mt) with double-sided adhesive pad.
	VE71KITF103A	Kit with interface profiles for Slider M35 Top, Slider M50 and Slider M50 Flex. 3 profiles (length 1.5 mt) with double-sided adhesive pad.
	VE71KITF104A	Kit with interface profiles for Slider S20. 3 profiles (length 1.5 mt) with double-sided adhesive pad.
